- 2021 - present **PhD in Computer Science**,
University of North Carolina at Chapel Hill.
Advisor: Dr. Snigdha Chaturvedi
- 2017 - 2018 **MS in Computational Linguistics**,
International Institute of Information Technology, Hyderabad.
Advisor: Dr. Radhika Mamidi
- 2013 - 2017 **B.Tech in Computer Science**,
International Institute of Information Technology, Hyderabad.

Experience

- May 2024 - **Research Intern at Bloomberg**.
July 2024 Worked on extracting universal entity representations from large language models.
 - Explored how large language models inherently encode rich entity representations in-context. Without any entity-specific fine-tuning, entity representations extracted from decoder-based LLMs can be applied to tasks such as entity linking, entity typing, slot filling, and question answering by leveraging ranking and clustering with embeddings.
- May 2023 - **Research Intern at Bloomberg**.
July 2023 Worked on document expansion with large language models for improving document retrieval
 - Improving document retrieval by using large language models to generate and integrate a diverse set of questions into documents (document expansion), enriching content for improved search results.
- May 2022 - **Research Intern at Adobe**.
July 2022 Worked on transcript segmentation at Project Blink, Adobe's video sharing platform.
 - Proposed a pretraining strategy that improves transcript segmentation by training in a curated order, with samples arranged in increasing similarity. Published our work at EACL 2023 (Findings)

- August 2018 - **Lead Engineer (Research) at Samsung R&D Institute India.**
- August 2021 Worked at Bixby Intelligence, Samsung's voice assistant.
- Automated WER Prediction of Bixby's ASR.
 - Automated Conversation Quality Estimation for the performance evaluation of Bixby conversations.
 - Data Augmentation to eschew manual annotations.
 - Authored research papers based on Text classification and Domain Adaptation at EMNLP 2019, CICLing 2019, NLDB 2019, NLDB 2020, ICPR 2020 and EACL 2021.
- Spring 2017 **Teaching Assistant, Natural Language Application.**
- 2017 The course covers popular Machine Translation (statistical) methods at the time such as IBM Models, Phrase-Based Models, and Neural Machine Translation.
- Monsoon 2016 and 2017 **Teaching Assistant, Natural Language Processing.**
- 2016 and 2017 An overview of various areas in NLP such as Tokenization, Parts Of Speech tagging, Natural Language Generation and Parsing.
